Hi [Ex. 6 - Personal Privacy]

I should be around, but you never know what will come up. I might hit you up for some suggestions on why I can tune for a few compounds from the WV MCHM spill, but when I run the gradient, I see all but one.

Give a call when you know the timing or have someone walk you to my lab- G201.

I know Annie. We go way back!

Cheers

Jennie

Subject: checking in on your instruments (and columns) - possible visit Thurs, 2/20?

Hi Jennie,

We've been playing a bit of musical chairs here at Waters this past month... so, I'd like to introduce Annie Landicho as your new Account Manager and myself as your consumables/chemistry representative! After years of mass spec, I am looking forward to spending more time learning about our customers' applications to see if newer/alternate chemistries might be of value. And, I can't say I will miss the drives to western PA and upstate NY...

This Thursday morning, 2/20, Annie and I will be on site to review MS data with the folks in the other wing. If you plan to be in, I would like to follow up on how your mass specs are working for you (and introduce Annie). This would be a technical visit, so I hope that will be okay. We also plan to come back next Tuesday, 2/25, to introduce my replacement as MS Specialist to the other group, but the timing has not been set yet. Please let me know if either day would suit your schedule, and we can confirm the timing.

Hope you're enjoying the snow and all's well.
Look forward to seeing you soon.
